Proven Performance

Introduction

Mid 2011 saw the opening of Lifestyle Motors with the introduction of low cost transport to assist the urban commuter, agriculture, mining and commercial sectors with transport solutions.

The Lifestyle range of motorcycles are all manufactured with internationally approved ISO 9001:2015 certification, EU and USA emissions certified, are supplied and fully backed up with genuine spare parts.

The LS110DB

Introducing the LS110DB, this little “gem” is certainly going to surprise you. The sturdy 110cc motorcycle is nothing to scoff at. What it lacks in size it certainly makes up for in heart and eagerness to deliver.

Directed at the urban commuter with its slighter dimensions and smaller engine capacity for maximum fuel economy this little gem is going to get you to work at a fraction of the expense of your daily commute cost on public transport. In fact, with a ten litre fuel tank and at its best consumption of 60km/litre, an average commute to work could cost as little as 10 litres of fuel per month.

ISO 9001:2015 Certified

With a top speed of 80km/hr, this dynamite, compact four-stroke engine will turn heads giving you the impression you're riding something somewhat larger. The 4 speed rotary transmission is great for both inexperienced riders as a starter bike, and more experienced riders looking for economy and versatility.

Drums brakes both front and rear provide a more than adequate stopping capability comparable to some larger 125cc models. Sporting a protective bar for safety, and rear carrier, this is the most versatile motorcycle on the road.

The suspension is also up to the task, with a carrying capacity of up to 150kg's. Impressive considering overall size.

If you want a reliable, cost effective commuter/delivery bike then the **LS110DB** has what you are after, with a price tag to make the competition's eyes water.
