**Proven Performance**

## Introduction

Mid 2011 saw the opening of Lifestyle Motors with the introduction of low cost transport to assist the urban commuter, agriculture, mining and commercial sectors with transport solutions.

The Lifestyle range of motorcycles are all manufactured with internationally approved ISO 9001:2015 certification, EU and USA emissions certified, are supplied and fully backed up with genuine spare parts.

## The LS125TB

This 125cc "trail bike" is both rugged and comfortable, versatile enough to be used on and off road where you will experience power, comfort, economy and reliability.

Boasting a fuel economy of 40km/ltr from its twelve litre fuel tank giving you a total range of 480km. The telescopic front suspension is able to absorb the harsh terrain and rough roads whilst the rear mono-shock ensures that the rear of the bike is "planted" firmly on the ground giving the best traction and handling of any bike in its category. The 5 speed manual transmission provides adequate gearing for tricky terrain, farm roads or comfortable highway cruising.

**ISO 9001:2015 Certified**

Coupled with a 21inch front wheel ensuring sufficient stability and the rear 18 inch wheel providing great traction with intermediate tread tire, allowing an all surface ride. With front disc and rear drum brakes you are rest assured of reliable stopping power.

Ignition and power provided by a solid state CDI and stator coil, providing great reliability. This motorcycle will meet all needs, whether out of town work horse or as an urban based commuter.
